

Here's a few examples of how to use your scanner, printer and computer to find images for your event:

### To make tickets

1. Scan in the picture that you want to use

Ticket painting by Mac, 7, Bayview School, Vancouver

2. Using a programme like HP Scrapbook Assistant, Microsoft Paint or Adobe Photoshop or Adobe Photoshop Elements create a layer with the information you want

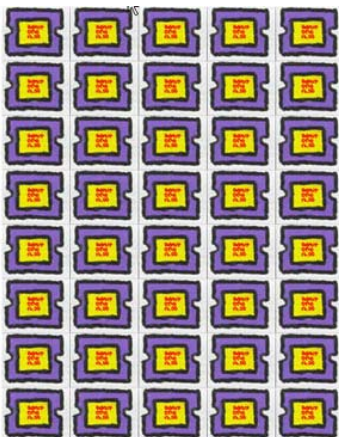

admit  
one  
\$1.00

3. If your software works this way, superimpose the two by dragging one image over the other.

4. Cut and paste a page of tickets print and cut up

## Find images everywhere

Scan in images from books that are out of copyright, and manipulate it until you have what you want.

1. Start with an illustration in a book. Scan it into your computer and open it in a graphics programme like HP Scrapbook Assistant, Microsoft Paint or Adobe Photoshop or Photoshop Elements.

2. Crop and clean up with the eraser tool gives you this

3, which you can put against a coloured background or do whatever you want with the image

## Clip Art

A handy source for images is clip art. You can find it by putting “clip art” into any search engine. Some is free, others you pay for—there are even options like subscribing for a week (\$14.95 U.S. on [www.clipart.com](http://www.clipart.com)). There is a huge variety of styles out there. Here's a sampling:
